PRESS RELEASE

New Stearns Road Concrete Paving

Concrete paving will begin on New Stearns Road, west of IL Route 25 the week of September 28, 2009. Drivers may expect to see large construction equipment entering and leaving IL Route 25, south of Gilbert Street. This will occur for one to two days. Flaggers will be present to stop traffic on IL Route 25 at various times to allow equipment into the paving area.

The County asks that you allow additional travel time and watch for equipment and flaggers as you travel through the work zone. We apologize for any inconvenience that these interruptions will cause and thank you for your continued support and cooperation through this construction season.

Concerns about the delays should be addressed to David Boesch at 630-845-7875.
