PRESS RELEASE

The Stearns Road Bridge Corridor Project includes improvements to the Illinois Prairie Path including a new paved path and two roadway underpasses allowing path users to avoid crossing a busy vehicular intersection.

The contractor has developed a plan that will allow the Illinois Prairie Path to remain open for the duration of the roadway construction. However, the existing path will need to be re-routed to remove it from the roadway construction area. The work needed to re-route the path requires a short term temporary closure of the Illinois Prairie Path. This closure will begin on September 8, 2009 and will be in place for approximately 4 weeks.

The County wishes to thank path users in advance for their continued patience and cooperation as we strive to strike a balance in maintaining the path while constructing the new Stearns Road Corridor improvements.

Questions or concerns may be directed to Kevin Ahern, at 224-535-8161.
